Software engineer with a background in marketing and a human-centered approach to technology. I design solutions that balance logic, creativity, and purpose. I believe in technology as a bridge between real needs and meaningful experiences. I blend analytical thinking with strategic sensitivity. My code aims to leave a mark—beyond the screen.

ABOUT ME

Allegro San Ángel Inn

Software Engineer | September 2025 – Present

- Contributed to the development of a financial management system for a notary's office, designing tailored software solutions to optimize operations and reporting.
- Assisted in the implementation and integration of new technologies to modernize internal processes and enhance the company's digital efficiency.
