Software Engineer with experience building web and business applications, with a background in Computer Systems Engineering and a Master's degree in Marketing. Experienced in full-stack development, backend engineering, system architecture, process automation, and systems integration. Skilled in Python, FastAPI, React, JavaScript, and SQL, with a focus on digitizing business workflows and developing scalable software solutions.

Allegro San Ángel Inn

Lead Software Engineer | September 2025 – Present

Digitized case-file management for a 3-person legal team, replacing physical workflows with a centralized platform for cases, documents, expenses, and financial movements.

Automated 8+ previously manual critical processes, eliminating operational bottlenecks by integrating CRM, case management, financial control, document generation, compliance, reporting, and client tracking.

Architected 15 technical modules supporting 10 business modules, integrating CRM, client management, case workflows, financial operations, dashboards, document automation, client tracking, and role-based security.

Reduced manual work for lawyers by centralizing client information, case operations, documents, workflow status, and financial data in a single platform.

Automated financial analysis and expense tracking per case, centralizing fees, taxes, third-party funds, invoices, expenses, and financial movements.

Implemented a 5-phase case workflow with automated business rules preventing incomplete cases from advancing without required signatures and fiscal or registration requirements.

Automated critical-case monitoring by flagging cases inactive for more than 15 days through dashboard indicators and alerts.

Developed a FastAPI backend for commercial parking operations, enabling real-time ticket issuance and transaction tracking through thermal-printer integration.

Technologies: Python, FastAPI, React, JavaScript, SQL, Linux, Git, VLANs

2026 FIFA World Cup Sports Pool

Developed and deployed a production web application using React, Supabase, and Vercel, covering frontend, backend, database, and deployment.

Legacy Hotel Management System

Modernized a monolithic PHP/MySQL web application by auditing legacy code, resolving broken endpoints (404s), and unifying the routing architecture for a Session-based Role-Based Access Control (RBAC) panel.

MICROSOFT – LAUNCH-X PROGRAM

Full-Stack Developer | August 2022 – December 2022

Developed a full-stack mobile application using JavaScript, Vue.js, Node.js, MySQL, MongoDB, and Microsoft Azure.

JA MÉXICO

Full-Stack Developer | September 2023 – November 2023

Supported the development and launch of operational web pages using HTML, CSS, and JavaScript, including debugging and troubleshooting.

UNIVERSIDAD ICEL

Master's in Marketing | May 2022 – Apr 2023

UNIVERSIDAD ICEL

Computer Systems Engineering | Sep 2017 – Aug 2020

Google — Web Development | 2022

Cisco — Cybersecurity | 2021

Cisco — NDG Linux Essentials | 2021

Future Learning Ireland — Trinity ISE | 2024–2025
